ABOUT ME

A lover of technology and digital world, looking for new experiences and knowledges, good co-worker that enjoys to learn something new everyday.

WORK EXPERIENCE

"VitraGlass" CRM system

Freelance project | November 2024 - January 2025

Front-end developer in the development of a CRM system for a company, the most relevant function on this CRM its that I implemented the google maps API with the purpose of save the location of the customers and to be capable of trace routes between your real time geolocation and the house of any customer

"Neoled" web page

Freelance project | June 2024- September 2024

front-end developer in the creation of the web page of a lighting store, the page is simple and allows the owner to add new items for the catalogue section in the admin panel, users can search and add products to the cart that the administrador will receive as a WhatsApp message. (The project doesn't count with e-commerce, the client only wanted to receive the orders as a WhatsApp message)

"Digital Verification Identity"

AndeanUX | June 2024- August 2024

front-end developer in the development of the web app where users can register by using the webcam of their devices, I implemented tensorflow technology for facial and object recognition so the registration can be easy and dynamic without pressing any button

"Fitness Club" admin panel

AndeanUX | March 2024-May 2024

Front-end developer in the admin panel for the Fitness Club web page. The project allows administrators to register new users and save their necessary data in a convenient and interactive interface

"Fitness Club" web page

AndeanUX | December 2023-March 2024

Front-end developer in the project Fitness Club, a web page created using Next Js technology. The project will help users have a better experience and comfort when choosing a sports center

EDUCATION

World technological institute OMIE

Higher technician in computer systems | 2023-Present

Universidad Mayor de San Simón

Civil Engineer | 2013-2018
