A lover of technology and digital world, looking for new experiences and knowledges, good co-worker that enjoys to learn something new everyday.

WORK EXPERIENCE

"Kargo" mobile app

Believe solutions | April 2025 - Present

Mobile developer in the creation of an app that allows drivers and importers to interact with each other. Importers can publish their available shipments so that drivers can see the available offers and be able to apply to carry that shipment.

"Fitness Club" mobile app

AndeanUX | February 2025 - July 2025

Project manager and developer in the creation of the mobile App for the Fitness club project, the app will allow the users to search and visit all the sport centers of the partners that are memberships of fitness club, giving the users an awesome and fresh experience at the moment to choose their sports centers

"Digital Verification Identity"

AndeanUX | November 2024 - January 2025

front-end developer in the development of the web app where users can register by using the webcam of their devices, I implemented tensorflow technology for facial and object recognition so the registration can be easy and dynamic without pressing any button

"Fitness Club" admin dashboard

AndeanUX | August 2024- October 2024

Front-end developer in the admin dashboard for the Fitness Club project. The project allows administrators to register new users and save their necessary data in a convenient and interactive interface

"Fitness Club" web page

AndeanUX | May 2024- August 2024

Front-end developer in the project Fitness Club, a web page created using Next Js technology. The project will help users have a better experience and comfort when choosing a sports center

"VitraGas" admin dashboard

Freelance project | March 2024- June 2024

Front-end developer in the development of a admin dashboard for a company, the most relevant function on this project its that I implemented the google maps API with the porpose of save the location of the customers and to be capable of trace routes between your real time geolocation and the house of any customer

"Neoled" web page

Freelance project | December 2023- February 2024

front-end developer in the creation of the web page of a lighting store, the page is simple and allows the owner to add new items for the catalogue section in the admin panel, users can search and add products to the cart that the administrator will receive as a WhatsApp message. (The project doesn't count with e-commerce, the client only wanted to receive the orders as a WhatsApp message)

EDUCATION

World technological institute OMIE

Higher technician in computer systems | 2023-Present

Universidad Mayor de San Simón

Civil Engineer | 2013-2018
